

Baba Kay's Cooking Instructions

Baba Kay always boiled her perogies. To cook, place Baba Kay's frozen perogies in boiling water, with oil and salt added to the water. Stir gently with a wooden spoon to prevent perogies from sticking together or to the pot. Boil perogies for 8-10 minutes, when perogies rise to the top boil for another 3-5 minutes until perogies are soft and cooked.

Tip from Baba Kay: If the water is boiling too hard it can cause perogies to burst open. If water is boiling too hard, add a little cool water.

Once perogies are cooked, drain and toss with melted butter or margarine. You can also fry onions in butter and pour over perogies.
